

Strategy

UK Students for the Exploration and Development of Space (UKSEDS) have defined this long term strategy which will form the basis of all decisions and actions within our operations:

Membership

- Expand the number of branches to cover all Universities with space-related courses in the UK
- Appeal to students beyond the traditional space related academic disciplines.

Funding

- Fund a variety of projects, events and outreach activities.

Projects

- Run a broad range of student led projects.
- Facilitate student involvement in non-UKSEDS led projects.

International

- Build active relationships with SEDS groups and (related) student communities around the world
- To provide a forum through which students can become involved in the international space community.

Outreach

- Promote exploration of space and the research and development of space-related technologies to the general public, especially young people.
- Provide opportunities for UKSEDS members to participate in these outreach programmes and gain valuable experience as a result.

Events

- Run a broad range of events including an annual conference.
- Facilitate international conferences.

Public Relations

- Raise the profile of UKSEDS so that all those working in the space industry and academia are aware of its existence.
